THE INVISIBLE PROTECTION

RAK-Sanit, a safe choice

2020: a new revolution of spaces and ways of living them begins.

A transformation that makes it necessary, from the design stage, to include new sanitation measures to be able to live the living and working spaces in total freedom and safety.

The R&D laboratories of RAK Ceramics, always at the forefront, were the first in the world to provide antibacterial solutions for interior design in 2009, thanks to the development of special certified antibacterial glazes.

Today, with the new RAK-Sanit program, RAK Ceramics offers an even wider range of solutions for sanitaryware, floors and walls, made with glazes that inhibit the growth of bacteria, thus reducing the possibility of contagion and contributing to create a healthier environment.

RAK-Sanit is the ideal solution for modern and safer schools, public and private offices, restaurants, hotels laboratories and for all the spaces where hygiene is of primary importance.

ANTIBACTERIAL SANITARYWARE

- Bathroom collections with RAK-ProTeK
- Seat & Covers with RAK-ProTeK
- Rimless Toilets
- The Freestanding revolution

TOUCHLESS FLUSHING

RAK-Sanit is a complete solution that includes toilet, bidet, washbasins, seat & cover, and rinsing systems. Each solution is capable of reducing bacterial contamination, helping to design safer bathroom environments, both for residential projects and for public areas such as hotels, restaurants, public & private offices, laboratories and schools.

ANTIBACTERIAL SANITARYWARE

RAK-ProTeK

Antibacterial and hygienic glaze

The new standard of hygiene

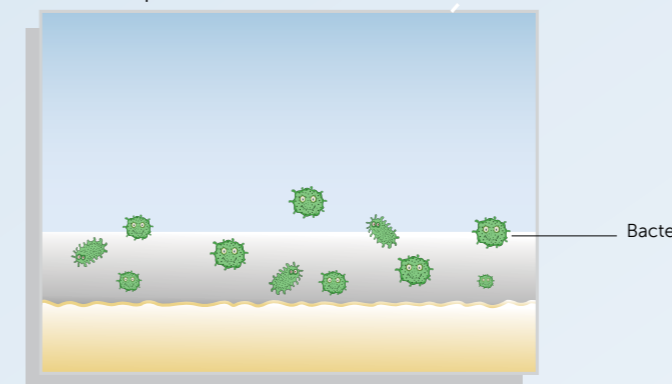

RAK-Sanit solutions for your bathroom are produced with RAK-ProTeK, the innovative ceramic glaze developed to protect wash basins, toilets and urinals, to make them more hygienic and easier to clean. RAK-ProTeK, which is baked into the ceramic during firing, results to a smoother surface, unlike standard ceramic with irregular surface.

This feature allows the particles accumulating on the ceramic to easily slip away making cleaning more efficient and convenient.

An innovative protection against bacteria

The silver ions contained in this revolutionary glaze, kill 99.9% of bacteria in 24 hours and prevent the bacterial growth, in comparison to conventional ceramic glazing. RAK-ProTeK glaze has been tested by Artest laboratory from the Italian Ceramic district in Modena.

Seat and cover with RAK-ProTeK

RAK-Sanit integrates its offer of antibacterial toilets with sanitised seats that make the toilet even safer and more protected.

The seat and cover are treated with silver ions that kill 99.9% of bacteria and prevents it from spreading. The range of RAK-Sanit seats and covers fit perfectly with each toilet included in the offer.

Rimless

EASY TO CLEAN,
WITH LOW WATER CONSUMPTION.

The Ultimate Rimless Technology for your bathroom

RAK Ceramics delivers the ultimate in technology for bathroom suites.

Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home.

RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

The Freestanding Revolution

Today, freestanding washbasins represent a new and important opportunity capable of combining design and fighting against the spread of bacteria. Going forward, this will be at the centre of a revolution in the approach to hygiene in both public and private places. Elegant in the classic bathroom area and functional if placed in the centre of large work environments or passageways.

The freestanding solutions included in the RAK-Sanit program, in addition to being treated with RAK-ProTeK antibacterial enamel, have deeper bowls than the traditional suspended sink, with a consequent reduction of splashes and the potential spread of bacteria.

Specify your residential or public restroom with RAK-Sanit solutions

RAK-Sanit offers designers the opportunity to include a rich series of room health solutions in their projects, be it for residential buildings or public areas such as hotels, restaurants, offices, and bathrooms. The tile collection included in the RAK-Sanit program is added to the range of bathroom products. A complete package, able to meet recent needs in terms of protection and sanitation of environments.

TOUCHLESS FLUSHING

RAK-SENSATION TOUCHLESS FLUSHING

The hygienic hands-free flushing experience

More Easy And Hygienic

Enjoy the same hands free, germ free experience of commercial restrooms. With the new Touchless Flushing System, this same ease of use and minimal spreading of germs has finally expanded to the home use toilets. A sensor module mounts underneath the toilet's cistern lid and runs on four AA batteries. It utilizes emerging sensing technology, which projects an electromagnetic field that is both extremely accurate and reliable. This type of sensor detects the user in the projected field and initiates the dual flush: 6 Liters keeping the hand above the spot, or 3 Liters waving the hand.

DUAL FLUSHING:

Still hand above the indicated spot for full flush.

Waving hand above the indicated spot for half flush.

Technical Information:

Sensor area is within 40mm~60mm from the surface of the cistern lid; effective diameter of the sensor area is within 100mm.

Battery life: around 2 years for family use, and 1 year for commercial using.

Override lateral push button in case of failed battery.
